Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Note: This is in response to Amendment filed 04/27/2006.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 5, 6, 8-12, 18, 19, 21, 22, 28-31, 52-53, and 89 are rejected under 35 U.S.C. 102(b) as being anticipated by Saunders (U.S. 5,176,696).

As to claims 1, 2, 5, 6, 8-12, and 89, Saunders discloses in figures 1-4, a pair of opposing blades (12,14, including spring members 62,64 and hinge 66), wherein each of said opposing blades (12,14) having middle sections (at 24,34), wherein each of said middle sections (at 24,34) including an extension support member (22,32) extending transversely relative to the direction of motion of the opposing blades (12,14) without being in direct communication with the other of the opposing blades (12,14) (see fig. 4); wherein the distal section of each of the opposing blades (12,14) includes cutting portion (20).

As to claims 18, 19, wherein the proximal section (at 62.64.66), the middle section (at 24,34) and distal section (at 36) of each corresponding opposing blades (12,14) form a generally arc shaped configuration, and wherein the generally arc shaped configuration forms a generally concave side at the top surface and a generally convex side at the bottom surface (when the surgeon

holds the instrument as shown in figure 3, with the instrument turns the opposite side), a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

Response to Arguments

3. Applicant's arguments filed 12/30/2005 have been fully considered but they are not persuasive. Applicant's arguments with respect to claims 1 and 89, that Saunder does not teach or suggest the proximal end of the opposing blades forming a first support location for engaging a portion of the radial side of the palmer surface of the handle and the distal end of the extension support member forming a second support location for engaging at least one of the middle finger, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 3734

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
